ARNT ELIASSEN—Geostrophy (Symons Memorial Lecture) 1

S. J. CAUGHEY and M. KITCHEN—Simultaneous measurements of the turbulent and microphysical structure of nocturnal stratocumulus cloud 13

R. BERKOWICZ and L. P. PRAHM—Spectral representation of the vertical structure of turbulence in the convective boundary layer 35

A. M. BLYTH, A. M. I. CHITTENDEN and J. LATHAM—An optical device for the measurement of liquid water content in clouds 53

ANNA KOZIKOWSKA, K. HAMAN and J. SUPRONOWICZ—Preliminary results of an investigation of the spatial distribution of fog droplets by a holographic method 65

K. HUSSAIN and C. P. R. SAUNDERS—Ice nucleus measurement with a continuous flow chamber 75

D. A. BENNETTS and M. OULDRIDGE—An observational study of the anvil of a winter maritime cumulonimbus cloud 85

I. J. FOSTER and T. J. LYONS—Tropical cyclogenesis: a comparative study of two depressions in the northwest of Australia 105

D. A. BENNETTS and P. RYDER—A study of mesoscale convective bands behind cold fronts: Part I. Mesoscale organization 121

C. A. PARRETT and M. J. P. CULLEN—Simulation of atmospheric hydraulic jumps in the presence of rotation and mountains 147

J. D. HAIGH—Radiative heating in the lower stratosphere and the distribution of ozone in a two-dimensional model 167

B. G. HUNT—Some wave characteristics of the middle atmosphere simulated in a general circulation model extending from the surface to 100 km 187

W. A. HECKLEY and A. E. GILL—Some simple analytical solutions to the problem of forced equatorial long waves 203

C. F. ROGERS and J. A. PYLE—Stratospheric tracer transport: a modified diabatic circulation model 219

GERAINT VAUGHAN—Mesospheric ozone – theory and observation 239

M. D. STEVEN—The anisotropy of diffuse solar radiation determined from shade-ring measurements 261

Notes and Correspondence

W. T. ROACH—On sympathetic fluctuations of cloud water content, and cloud top height in anticyclonic stratocumulus 271

S. C. MOSSOP—Production of laboratory clouds 275

Reviews

The origin and evolution of planetary atmospheres. By A. Henderson-Sellers (F. W. Taylor); *Numerical prediction and dynamic meteorology.* By G. J. Haltiner and R. T. Williams (M. J. Miller); *Atmosphere–ocean dynamics.* By A. E. Gill (J. S. A. Green); *Climate of Papua New Guinea.* By J. R. McAlpine and G. Keig (R. Murray); *Chemistry of the unpolluted and polluted troposphere.* Ed. By H. W. Georgii and W. Jaeschke (A. F. Tuck); *Radar observations of clear air and clouds.* By E. E. Gossard and R. G. Strauch (K. A. Browning); *Carbon dioxide: friend or foe?* By Sherwood B. Idso (T. Wigley); '*Meteor*' *Forschungsergebnisse* Reihe A/B No. 24 (G. E. R. Deacon) . . 279

Obituary notices 285

Election to membership 286

J. AUSTIN and T. N. PALMER—The importance of nonlinear wave processes in a quiescent winter stratosphere 289

J. S. FOOT—Aircraft measurements of the humidity in the lower stratosphere from 1977 to 1980 between 45°N and 65°N 303

R. J. ALLAM and A. F. TUCK—Transport of water vapour in a stratosphere-troposphere general circulation model. I: Fluxes 321

R. J. ALLAM and A. F. TUCK—Transport of water vapour in a stratosphere-troposphere general circulation model. II: Trajectories 357

R. BENZI, A. R. HANSEN and A. SUTERA—On stochastic perturbation of simple blocking models 393

TABLE OF CONTENTS

PAGE

S. HASTENRATH, MING-CHEN WU and PAO-SHIN CHU—Towards the monitoring and prediction of north-east Brazil droughts 411

A. C. LORENC—The evolution of planetary-scale 200 mb divergent flow during the FGGE year 427

A. J. THORPE and C. A. NASH—Convective and boundary layer parametrizations in a diagnostic model of atmospheric fronts 443

D. A. BENNETTS and P. RYDER—A study of mesoscale convective bands behind cold fronts. Part II: Cloud and microphysical structure 467

B. C. WEARE—Interannual moisture variations near the surface of the tropical Pacific Ocean 489

K. J. A. REVFEIM and J. W. D. HESSELL—More realistic distributions for extreme wind gusts 505

M. J. MILLER and A. A. WHITE—On the non-hydrostatic equations in pressure and sigma coordinates 515

W. H. RAYMOND and H. L. KUO—A radiation boundary condition for multi-dimensional flows 535

A. LINDROTH—Gradient distributions and flux profile relations above a rough forest . 553

Reviews

Atmospheric Diffusion. By F. Pasquill and F. B. Smith (W. Klug); *Air–Sea Exchange of Gases and Particles.* Ed. P. S. Liss and W. G. N. Slinn (M. H. Smith); *Radarmétéorologie: Télédétection active de l'atmosphère.* By H. Sauvageot (J. R. Probert-Jones); *Nowcasting.* Ed. K. A. Browning (D. H. McIntosh); *Inverse problems of lidar sensing of the atmosphere.* By V. E. Zuev and I. E. Naats (L. Thomas); *Carbon dioxide review: 1982.* Ed. W. C. Clark (J. F. B. Mitchell) 565

J. C. MARSHALL—Eddy-mean-flow interaction in a barotropic ocean model . . 573

R. A. FLATHER—A numerical model investigation of the storm surge of 31 January and 1 February 1953 in the North Sea 591

D. T. LLEWELLYN-JONES, P. J. MINNETT, R. W. SAUNDERS and A. M. ZAVODY—Satellite multichannel infrared measurements of sea-surface temperature of the NE Atlantic Ocean using AVHRR/2 613

J. D. WOODS, W. BARKMANN and A. HORCH—Solar heating of the oceans—diurnal, seasonal and meridional variation 633

D. G. ANDREWS—On the stability of forced non-zonal flows 657

R. GROTJAHN—Baroclinic instability in a long wave environment. Part I: Review . . 663

R. GROTJAHN—Baroclinic instability in a long wave environment. Part II: Ageostrophic energy conversions 669

D. BOLTON—Generation and propagation of African squall lines 695

G. J. HOLLAND and R. T. MERRILL—On the dynamics of tropical cyclone structural changes 723

K. P. SHINE—Parametrization of the shortwave flux over high albedo surfaces as a function of cloud thickness and surface albedo 747

Notes and Correspondence

A. J. HEYMSFIELD and S. C. MOSSOP—Temperature dependence of secondary ice crystal production during soft hail growth by riming 765

Reviews

Man-made carbon dioxide and climate change. By P. S. Liss and A. J. Crane (J. F. B. Mitchell); *Satellite microwave remote sensing.* Ed. T. D. Allan (P. J. Minnett); *Social science research and climate change.* Ed. R. S. Chen, E. Boulding and S. H. Schneider (R. S. Scorer); *Changing climate.* US National Research Council (S. B. Idso); *The urban atmosphere—Sydney, a case study.* Ed. J. N. Carras and G. M. Johnson (F. B. Smith); *Large-scale dynamical processes in the atmosphere.* Ed. B. J. Hoskins and R. P. Pearce (A. A. White); *Climate and energy systems: a review of their interactions.* By Jill Jäger (J. F. B. Mitchell); *Climate change in Canada*: 3. Ed. C. R. Harington (R. Murray); *Sunsets, twilights and evening skies.* By A. and M. Meinel (K. J. Weston); *Can we delay a greenhouse warming?* By S. Seidel and D. Keyes (S. B. Idso); *Environmental Oceanography.* By T. Beer (B. Johns) 771
